Continuation of Substance of Interview including description of the general nature of what was discussed: Discussed the objection to drawings. It is the Examiner unchanged position that the elected embodiment, shown in figures 53-54, fails to show the "compliant portion operable to be expanded and contracted". Applicant previously responded that element 1512 is the compliant portion. In view of applicant's drawing and specification, it is unclear why element 1512 is considered a compliant portion operable to be expanded and contracted. The drawing must show every feature of the invention specified in the claims; the compliant portion is an element vital to applicant's device. Ms. Comninou asked how to overcome the objection, the Examiner response was please show a compliant portion like that shown in other figures, for example figure 52 (make sure all drawing changes are supported).
